

# AMBER WORKSHOP 2011. 3-6 May, 2011 - Barcelona

A workshops that teach Molecular Dynamics via practical introduction to the AMBER Molecular Dynamics Software have been taught over the years by Ross C. Walker and Adrian E. Roitberg assisted by other members of the AMBER development team.

## Attendees

Attendees consist of Graduate students and postdocs as well as few faculty interested in learning about Molecular Dynamics techniques. The number of students is limited by the availability of hardware for the hands on tutorials. These require each student to have access to a desktop running Linux. Student number is limited to 40.

## Duration

These workshop last 4 days and consist of a lectures, about 3 hours per day, and hands on tutorials, about 5 hours per day.
