

Figure 8 – Order parameters for the 72 systems averaged over 250ns (\bullet sn-1, \blacksquare sn-2) and 288 systems averaged over 100ns (\blacklozenge sn-1, \blacktriangle sn-2) for each lipid type. Comparison to experiment shown (\circ sn-1, \square and \triangle sn-2) for DLPC,^{52, 59} DMPC,^{52, 59} DPPC,^{52, 59} DOPC⁶⁰ and POPC.^{60, 61}
