Hard Drive Bays

Silverstone ST1500 1500 W Silver

This is where the bottom GPU sits...

Accessory plugs too long for GPU to seat right.
Power, reset terminals disassembled:
Female disconnectors shrink
wrapped individually to prevent shorts; metal
disconnectors easily bent for GPU clearance. You
only really need power and resets...

Cardboard from GPU boxes
and some clear tape (mod_2)

The front and back pieces
taper from wider fan to
narrower GPUs

120mm fan that
came with case;
Snaps right into
existing mounts
